Acupuncture Questionnaire

Please answer all questions the best to your knowledge and email the information back to us
Email Address: bullcityveterinaryhospital@gmail.com **OR** Print out the questionnaire and bring in the completed form when you come in for your initial visit

What is the general history of your pet, what problems would you like to discuss?

Of the problems listed above when did they begin and how have they changed over time?

Is your pet on any current medications, if so, how effective would you say they have been?

Has your pet had any prior drug reactions?

What are you currently feeding your pet, how well are they eating, and how long have they been on their current diet?

What are your pets drinking habits: Does your pet prefer cool or warm water?

Does your pet drink more or less water than you would consider normal?

Does your pet have any history or current issues with vomiting? If yes, how frequently and description (digested food, undigested food, bile, clear, etc.)?

Does your pet have any history or current issues with Sneezing and or coughing? If yes, time of day most often occurs?

How often does your pet have a bowel movement and what is the consistency of it (soft, firm, etc.)?

What color is your pet's urine and how often does he/she urinate?

Does your pet have any urinary or fecal incontinence?

Is your pet restless or fidgety and if so, is there a time of day it is worse, at night or during the day or all the time?

Has there been a change in energy and stamina?

Is your pet startled by loud noises or sudden movements?

Does our pet have a preference for cool or warm places?

How would you describe your pet's general personality: calm, always happy, shy, afraid of strangers, irritable etc.? Any recent behavior changes?

Does your pet have any history of seizures?

 Does your pet have any surgical implants?

Is your pet undergoing any current therapies (rehabilitation, chemotherapy, radiation therapy)?

In your opinion, what makes your pet feel better and what may make your pet feel worse?
